

MORE than 75% of AMERICANS are DEFICIENT in MAGNESIUM. Are YOU?

KNOW YOUR MAGNESIUM LEVEL

Magnesium (Mg) is responsible for more than 325 enzyme reactions within a cell, including energy production. When cellular magnesium is low, these necessary chemical reactions are adversely affected. Low Mg levels are found in**:

- ◆ Brain Fog
- ◆ Celiac
- ◆ Diabetes
- ◆ Fatigue & Muscle Pain
- ◆ Fibromyalgia & ME/Chronic Fatigue
- ◆ Heart Disease & Hypertension
- ◆ Irritable Bowel Syndrome
- ◆ Obesity
- ◆ Sleep Issues
- ◆ Vascular Disease

A Magnesium Red Blood Cell test (Mg RBC) measures cellular Mg levels. It is the only Mg test recommended by Thomas Romano, M.D.* If the level is low (even low normal), oral Mg is recommended. If very low, IV drip or intramuscular (push) Mg may be necessary to bring levels up more quickly.

A common Mg test is done on blood serum or plasma but these parts of the blood do not represent cellular levels.

Mg RBC is *the most efficient or practical way to test* for cellular magnesium. Therefore, ask your doctor for the **Mg RBC test**.

Your doctor's office can draw the necessary blood and ship it to Quest for processing if a local laboratory does not offer Mg RBC testing. Your doctor needs a Quest client number or account first. You may wish to have the test done even if your insurance company does not pay for it. Check with your local lab for the cost. To find a Quest laboratory near you call the general number below.

Quest Labs	866-697-8378 (National)
Sonora Quest	602-685-5000 (Arizona)

MAGNIMIZE™ YOUR MAGNESIUM!

TAKE FIBRO-CARE™ - FOR OPTIMUM CELLULAR ABSORPTION

Taking the right form of Mg makes THE difference in how much gets inside the cell where it really matters. Fibro-Care™ uses magnesium bisglycinate, a highly absorbable patented chelate from Albion Laboratories, Albion Mg is bound (chelated) to the amino acid *glycine*. Most minerals are in oxide form or have a token amount of a chelate. These forms are hard to break down and absorb, which contribute to GI discomfort, constipation or diarrhea. We use only Albion patented Mg bisglycinate. Plus Fibro-Care™ includes the bio-available cofactors of B₁, B₆ and manganese. Malic acid helps energy and pain, Fibro C™ boosts activity.

Fibro-Care™. The original and the best!
